Title: **SCROLLER EV** - New Era of Micromobility: Introducing Revolutionary **SCR HYPE** Models

For publication immediately

Date: 06-12.11.2023

Place: Milan EICMA

The company **SCROLLER EV** presents an evolution in the field of micromobility - **SCR HYPE** models - High Performance Stand Up E Scooter.

Find out how the **SCROLLER EV** is changing the game in the world of micromobility with the new **SCR HYPE** models

In today's world of fast-paced urban life, our daily mobility requires innovative solutions. **SCROLLER EV** Company presents **HYPE**, its latest innovation in the world of micromobility that sets new standards in safety, performance, environmental friendliness and design.

Discover **HYPE'S** Revolutionary Features:

Attractive design: **SCR HYPE** models combine aesthetics and functionality. Their modern design attracts attention wherever they go, while at the same time they easily fit into urban environments.

Robustness: They are built to withstand daily use and different road conditions. Regardless of whether you move on asphalt or gravel, **HYPE** models are ready for challenges.

Traffic accessibility: Regardless of whether you're in a city jam, looking for a parking space or a fast mode of transportation, **HYPE** models are practical, fast and economical.

Ease of use: They are intuitively designed, which makes them accessible to everyone, regardless of age. Driving on **HYPE** models is simple and pleasant.

Safety: Your safety is our priority. The high position of the driver in relation to other road users guarantees visibility while driving.

The fixed standing position on the ergonomic platforms gives an excellent feeling of stability. The firm and wide grip of the adjustable handlebar helps with balance.

Exceptional feeling while driving: The feeling of freedom while driving on **HYPE** models is unique and unforgettable. They provide you with agility and speed regardless of the type of terrain.

SCROLLER EV is dedicated to the future of mobility and sustainable transport. Our **SCR HYPE** models revolutionize the way you get around town, reducing congestion, emissions and costs.

In 2024, we will announce collaborations with eminent teams of experts who contributed to the development and production of the **HYPE** model, and at the

same time we are using the opportunity to announce the **SCR HYPE** model intended exclusively for use on the track.
